

Guidelines for the poster preparation/presentation in *International Conference*

on

“Recent Advances in Photonics and physical Sciences”

After evaluation of abstracts submitted to conference, recommended abstracts will be presented in poster session and evaluated by the technical committee to award/nominate the best posters.

Posters Components

Depending upon the domain of research poster can be prepared but the poster should have following components.

Title: Title should be in large fonts and attract potential viewers.

Logos: If possible, institute logos or affiliations should be minimized in size and put in the lower corner of the poster, or alternatively, next to the title.

Author’s name and affiliation: Authors name and affiliation should be clear. Corresponding author will present in poster session.

Keywords: 3-5

Introduction: Highlight the problem with minimum background information. Put the objectives of your study at the end of your introduction.

Methods: Be short, but precise depending upon domain of your research. Mention statistical tool, softwares, laboratory and other methods name which was used.

Results: Briefly provide descriptive results depending upon your domain.

Graphics and tables should have a complete title and legend.

Conclusion and recommendations: Comment on main results and discuss why they are conclusive and interesting. What are your future recommendations?

Acknowledgments/further information: Thanks individuals and funding sources. Provide your e-mail address for further information.

References: Cited paper should be numbered in poster content (same as for paper style of conference)

Poster size: Width 3 feet & Length 4 feet
